### PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate (CGPA 8.5/10) who learns by building. Shipped three independent projects spanning machine learning, workflow automation and web deployment - including a flood-risk prediction system built during an AI/ML internship, and two Gemini-powered automation agents built from scratch. Comfortable across the data pipeline: cleaning and modelling data in Python, visualising insights in Power BI/Excel, and automating repetitive workflows with n8n. Looking to bring this project-first, self-taught approach to a Data Analyst or Software Engineer role.

### TECHNICAL SKILLS

**Programming & Data:** Python (Pandas, NumPy, Scikit-learn), SQL, Statistics, Data Cleaning & EDA

**Visualization & BI:** Power BI, Tableau, Excel, Google Sheets, Matplotlib

**Automation & AI Tools:** n8n, Google Gemini API, Flask, REST APIs, Prompt Engineering

**Dev Tools:** Git, GitHub, VS Code, Jupyter

### PROJECTS

#### Rising Waters - Flood Prediction System

SmartBridge AI & ML Internship

Python, Flask, Pandas, NumPy, Scikit-learn, Jupyter | [github.com/sshanvaz2006/Rising\\_waters\\_Smartbridge](https://github.com/sshanvaz2006/Rising_waters_Smartbridge)

- Built an end-to-end Flask web app that predicts flood risk from 10 rainfall and weather parameters using a trained Scikit-learn model.
- Cleaned and explored historical rainfall data, building correlation heatmaps and histograms to identify the strongest flood-risk predictors.
- Serialized the model with Jupyter and integrated it into a Flask backend with input validation, logging and a health-check endpoint, documented with an architecture diagram and user manual.

#### AI Meeting Minutes Generator

Personal Project

n8n, Google Gemini API | [github.com/sshanvaz2006/n8n-meeting-minutes-agent](https://github.com/sshanvaz2006/n8n-meeting-minutes-agent)

- Built an automation workflow that converts raw, unstructured meeting transcripts into structured minutes - decisions, action items and deadlines - using Google Gemini.
- Designed the workflow with modular, reusable nodes and formatted output as clean Markdown tables, ready to share directly after a meeting.

#### AI News Summarization Agent

Personal Project

n8n, Google Gemini API | [github.com/sshanvaz2006/n8n-news-summarization-agent](https://github.com/sshanvaz2006/n8n-news-summarization-agent)

- Built a second n8n automation that condenses raw news articles into structured daily briefings with key takeaways and trends.
- Applied prompt engineering to keep the LLM's output consistent, packaging the workflow to run end-to-end with just a Gemini API key and no custom code.

### INTERNSHIP EXPERIENCE

#### AI & ML Virtual Internship - SmartBridge

[EDIT: Add duration]

- Completed a project-based internship covering the full ML lifecycle: data collection, exploratory data analysis, model training and deployment.
- Delivered "Rising Waters," a working flood-prediction web application, as the internship capstone project.

### CERTIFICATIONS

- Python Certification - SkillUp (Simplilearn)
- AI & ML Internship Certificate - SmartBridge

### EDUCATION

#### B.Tech, Computer Science & Engineering - Gates Institute of Technology, Gooty

2023 - 2027 (Expected)

CGPA: 8.5 / 10 | Roll No. 23F21A05A6

#### Intermediate (12th) - [EDIT: College/Board Name]

[EDIT: Year]

Percentage: 92%

#### SSC (10th) - [EDIT: School/Board Name]

[EDIT: Year]

Percentage: 95%

### ACHIEVEMENTS & EXTRA-CURRICULAR

- Student Member, Institution of Engineers (India) - IEI
